# R2R Game Prize Payout

- Current PS payout rate is 67%; new PS payout rate is 70%.
- The change from the current PS to the new PS decreases the betting risks of the game and possible exposure produced by maximum prizes per bet type e.g., decrease of max prize of Trifecta from $31,454 to $16,781.
    - Keeping the same probability and using the augmented 70% RTP, the new prize would be even higher ($33,016). Of course, the risk (as well as the attractiveness of any market) depends on its popularity, meaning how often the players choose this market or this specific result.
- With the new probability set, the maximum prize of Superfecta is $345,536. In the existing probability set, the Superfecta exposure would have been $683,433 if the Superfecta existed.
